

## **Stitching Operator**

As a Stitching Operator on the Domestic Development team, you must possess fine motor skills and attention to detail. Your primary focus is stitching; however, you must also be proficient in using other relevant equipment including NC cutting machines, computer stitchers and others as needed. Training for these modern manufacturing tools will be provided. You will work with pattern engineers and designers to refine patterns for manufacturing. Your major responsibility is to create the highest quality footwear samples for design, development and client review.

### **Duties and Responsibilities:**

- Strong, efficient skill with industrial sewing machines
- Cutting, gluing and stitching provided footwear patterns
- Responsible for providing highest quality product
- Basic knowledge of the mechanics of stitching equipment, including replacing and changes out thread, needles and bobbin thread as needed
- Can identify errors, high attention to detail
- Capable of using relevant software as needed
- Completes work efficiently and accurately
- Supports the team effort
- Ability to respond and follow through with detailed instruction
- Adheres to all company policies and procedures, and abides by all safety regulations
- Performs other duties as assigned

### **Qualifications:**

- Knowledge of, and ability to use, industrial sewing machines
- Hardworking and self-motivated, with an eagerness to learn and a Can-Do attitude
- Strong computer skills and ability to learn relevant software
- Ability to work in a fast paced, highly accurate production facility
- Ability to communicate with the team members and management
- Ability to lift or move 30 pounds
